

INVITATION

Sustainable Textiles: EcoDesign Regulation and Readiness Assessment Tool (ERAT)

Friday, 12 June 2026, 9:30CET, Zoom platform

Want to participate? Register [here](#)

Chamber of Economy of the Federation of B&H (P/G KFBiH) with the technical support of the Swiss Import Promotion Programme (SIPPO), and in cooperation with five regional business support organizations for textile industry companies in the Balkans (Bosnia and Herzegovina, Albania, and North Macedonia, and Serbia) invites you to attend the webinar “**Sustainable Textiles: EcoDesign Regulation and Readiness Assessment Tool (ERAT)**”, which will take place on Friday, 12 June 2026, starting at 9:30 AM CET via the Zoom platform.

As new European Union regulations continue to shape the future of the textile industry, timely understanding and preparation for compliance are becoming increasingly important. During the webinar, participants will have the opportunity to hear from SIPPO sustainable textile consultants Simone Seisl, Katharina Schaus, and Tobias Meier about how the EcoDesign Readiness Assessment Tool (ERAT) can support export-oriented textile companies in assessing and strengthening their readiness for key regulatory frameworks and requirements, including an overview of:

- ESPR (Ecodesign for Sustainable Products Regulation)
- DPP (Digital Product Passport)
- EPR (Extended Producer Responsibility)
- ESG reporting (Environmental, Social and Governance standards).

Participants will also gain practical insights into the implementation of the new tool, the planned activities, and the expected outcomes of the EcoDesign project in the Balkan countries, as well as the opportunity to ask questions and provide feedback during the early stage of defining the tool’s scope and functionality.

Whether you are a textile manufacturer or an export-oriented company, this webinar offers an excellent opportunity to stay informed, prepare strategically, and actively

contribute to shaping a practical regional approach to strengthening the textile sector's readiness for emerging sustainability requirements.

Participation is free of charge, with mandatory registration no later than Thursday, 11 June 2026 at 12:00 PM, via the following link:
